

SHARE BRIDGE CODE:

To call PerioPal from another Windows application, add six lines of code to your system. The command structure is:

```
[Application Path]/PerioPal "PtChart; PtName ; PtBday; PtMedAlert"
```

Where :

[Application Path] Usually = C:\Program Files\PerioPal\

Pt Chart = AlphaNumeric Chart number from the Office Management System

PtName = Patients Last, First Middle Init

PtBday is the Patient Birthdate in any Microsoft Access compatible date format

Pt MedAlert is a Y or N .

Note: All 4 arguments are passed as a single string with a ' ; ' as the field delimiter

```
"C:\Program Files\PerioPal\PerioPal.exe" "1; Black,Jack; 11/26/1983; N;"
```
